Resource Guide

One Shot Automation: Your Project Partner

At One Shot Automation, we pride ourselves on being a versatile and dynamic partner in bringing your industrial, electrical, and mechanical projects to life. With our turnkey services in Industrial Automation including electrical installation, construction management. You can leverage our expertise individually or have us partner with your trusted General Contractors.

Scope of Services

Control System Design: We specialize in transforming your business operations through advanced automation solutions. From supplying top-notch hardware to developing custom programming, our goal is to significantly enhance your operational efficiency and productivity.

Expert Electrical Solutions: Our electrical installation services are backed by years of experience and a team of highly skilled electricians. We ensure excellence in every project, from comprehensive electrical system designs to professional installations and ongoing maintenance.

Control System Integration: Our industrial automation solutions are crafted to elevate your productivity and efficiency. With a deep understanding of automation nuances, we not only design and implement systems that are perfectly aligned with your specific operational needs, but trouble shoot and retrofit existing solutions.

Seamless Construction Management: We offer end-to-end construction management services, taking charge of projects from their inception to completion. Our experienced team ensures smooth execution, quality, and timely delivery, taking the hassle out of your construction projects.

Control System Design and Integration Services

- **Control Panel Design:** Design and implement control enclosures for project specific goals.
- **Hardware Supply:** Provision of cutting-edge automation hardware tailored to specific business needs.
- **Custom Programming:** Development of software solutions to automate and optimize business processes.
- **System Integration:** Seamless integration of automation hardware and software into existing systems.
- **Efficiency Consulting:** Expert analysis and recommendations to identify and implement efficiency improvements.

Tailored Industrial Automation for Peak Productivity

- **Custom Solution Design:** Development of tailored automation solutions to meet unique industrial requirements.
- **Process Automation:** Implementation of automated systems for manufacturing, assembly, and process control.
- **Control System Upgrades:** Modernization of existing control systems for enhanced performance and reliability.
- **Data Management and Analytics:** Integration of data collection and analytics tools to improve decision-making and efficiency.

Electrical Installation Services by One Shot Automation

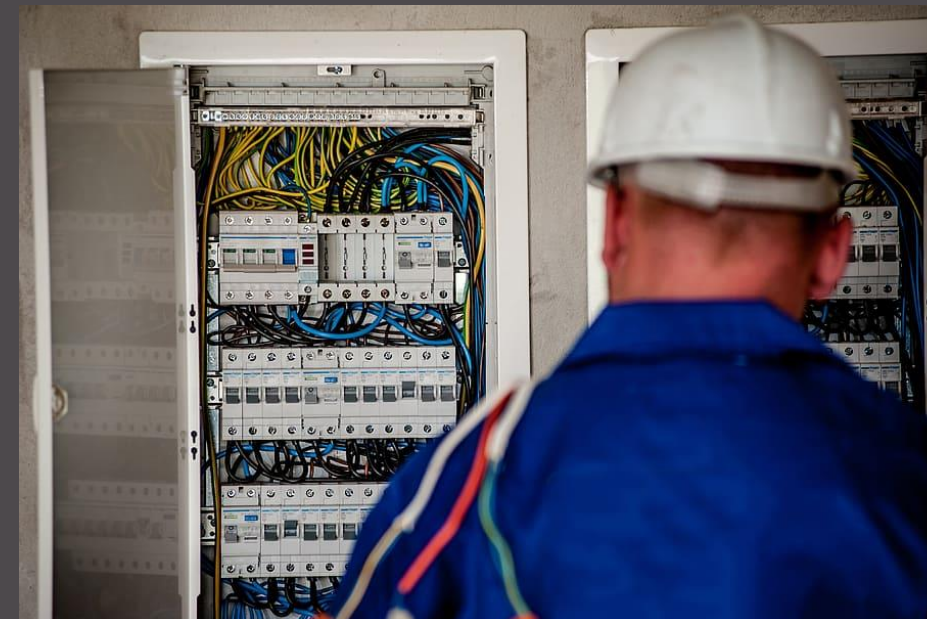

Electrical Design: Comprehensive electrical system design, from schematics to full-scale implementation plans.

Installation Services: Professional installation of electrical systems, components, and infrastructure.

Maintenance and Support: Ongoing maintenance services to ensure electrical systems remain operational and efficient.

•**Safety Inspections and Compliance:** Thorough safety inspections and modifications to comply with industry standards and regulations.

Partnering with One Shot Automation: Your Flexible Project Ally

Whether you're looking for a specialized subcontractor to handle specific aspects of your project or need a reliable general contractor to oversee the entirety of your operations, One Shot Automation is equipped to adapt to your needs. Our flexible approach ensures that we can slot into your project framework in a way that best suits your objectives, providing you with varying degrees of control and involvement.

Flexible Partnership Models:

- **As a Specialized Subcontractor:** Tap into our specialized expertise for specific project components, enjoying the flexibility to maintain control over the broader project while benefiting from our focused skills in automation, electrical installations, or construction management.
- **As a General Contractor:** Entrust us with the overall management of your project, where we serve as the primary point of contact and accountability. This model allows for strategic oversight on your part, with One Shot Automation handling the comprehensive execution of the project.
